

AUGUST PEACOCK PASSPORT

Can you find these cool sights at the Arboretum? Travel the garden to make your discoveries, then return to the Membership office to receive a stamp on your passport page! Be sure to come back next month with your new passport page to continue your expedition. Each month brings new adventures!

SULPHUR BUTTERFLIES

Can you spot these beautiful butterflies flitting around the gardens? They are most active during the late summer and early fall. They come in various shades of yellow and white. Look for them on the Gold Medallion Tree.

PLUMERIA

The hottest time of summer brings out the beautiful blooms in our plumeria grove. Can you count 4 different colors of these flowers? How many different ones are there?

GOLD MEDALLION

These gorgeous trees feature bright yellow clusters of flowers that bloom in the late summer. They are also one of the host plants to sulphur butterflies. A host plant are plants that an organism lives on and lives off of.

GREEN THUMB

The plants in our garden need to be tended to regularly. There are all different kinds of gardeners who work with all different types of plants. Can you spot a gardener working? What are they doing? Be sure to say hello to them!

LOUNGING LIZARDS

Lizards are ectothermic, or cold-blooded animals that need the warmth of the sun to survive. Can you spot a lizard sunbathing?

THIRSTY ANIMALS

Where there's water, there's wildlife! Just like us, animals need water to survive and stay cool. Can you find a place you think animals might like to drink from?
